

As a leading university hospital rich in tradition, Inselspital Bern, which belongs to the Insel Group, is a medical competence and high-tech center with an international reputation and at the same time a first-class educational and research institution.

Cardiac Device Specialist

Medical Division Rhythmology
University Hospitals for Cardiology
80 - 100 % | in Bern Switzerland

The Cardiovascular Center combines the University Departments of Cardiology, Cardiovascular Surgery and Angiology. As the nation's leading centers in the evaluation and treatment of cardiovascular diseases, the range of services includes the entire spectrum of interventional and surgical treatments. In research and science, the clinics enjoy national and international recognition.

Your challenge

As a Cardiac Device Specialist, you will be responsible for setting and monitoring all implantable cardiac Devices. This includes pacemakers, ICDs and implantable loop recorders. To perform this job, you will visit various departments within the hospital, such as the Catheter Lab (to provide implantation support), the outpatient cardiology department (outpatient checkups), all nursing departments, the X-ray department, emergency room, Cardiac Intermediate Care.

We have 42 hours per week available to work as a Cardiac Device Specialist. Possibly the position can be expanded to work within the cardiac function in the outpatient department, depending on your background. Furthermore, you are flexibly deployable for work as a Cardiac Device Specialist. In short, a challenging and varied position!

Your profile

Completed training with specialization as a pacemaker/ICD technician (preferably EHRA certified)
You have excellent verbal and social communication skills
You are a team player and committed to work in a small team
You are stress resistant and flexible
You work in an integer, accurate and organized manner
Good command of the English language in word and writing
Reasonable command of German language

Our offer

Diversity in work activities

A collegial and informal work atmosphere with a positive learning climate

Attractive salary with good social benefits

Opportunity for training in the field

Good working conditions
